

UNPLUGGED

Build Healthier Digital Habits Through Play

Gamified · Social · Rewarding

OVERVIEW

Presentation

01 Problem Statement

The digital overload crisis and solution gap

02 App Concept & Value Proposition

Solution idea, user benefit, and unique value

03 Key Features

Core features responding to user needs

04 User Research Insights

Competitor analysis and market positioning

05 Target Audience & Personas

User groups, needs, pain points, and behavior

06 User Flow & Journey Map

Main user path and platform support

07 Handmade Prototype & Iterations

Paper sketches and key improvements

08 Figma Prototype

High-fidelity interactive screens

09 UI Design System

Colors, typography, icons, components

10 Visual Hierarchy

Attention guidance, readability, accessibility

11 Business Model Canvas

Value creation, delivery, and capture

12 AI Marketing Video

30-60 second promotional video strategy

13 Lessons Learned

Team insights and future improvements

14 Thank You & Q&A

Team contacts and closing

01

Problem Statement

Understanding the digital overload crisis

The Digital Overload Problem

Excessive Screen Time

The average person spends **7+ hours daily** on screens, leading to digital fatigue and reduced real-world engagement.

Difficulty Focusing

Constant notifications and social media create **fragmented attention**, making deep work nearly impossible.

Burnout & Imbalance

Poor work-life boundaries and social media burnout leave users feeling **drained and disconnected**.

"We understand how overwhelming constant connectivity can feel."

02

App Concept & Design

Our Solution

App Concept & Value Proposition

OUR MISSION

Help users build healthier digital habits by encouraging meaningful time offline, transforming screen-time reduction from a *chore* into an **enjoyable journey**.

Gamified

Challenges, levels & rewards make digital wellness fun

Social

Guilds & accountability groups for community support

Rewarding

Fun & motivating experience with badges and rewards

VALUE PROPOSITION

Combines offline challenges, social guilds, and gamified rewards.

"Your friendly companion for digital wellness"

03

Core Features

Core Features

Everything you need to build lasting digital wellness habits

Offline Challenges

Daily, weekly, and themed quests like "Read 20 pages" with photo check-ins as proof of completion.

Gamification

Levels, XP, streaks, achievement badges, guild levels, and rewards for consistency.

Guilds & Groups

Join or create hobby-based Guilds. Share completed challenges in guild feeds with friendly competition.

User Profiles

User profiles with badges, stats, and interests. Guild customization with icons, themes, and rules.

Analytics Dashboard

Track time spent offline, challenge completion history, productivity streaks, and weekly insights.

Smart Notifications

Push notifications, reminders, social sharing, and continuous updates based on user feedback.

● Daily & Weekly Quests ● XP & Badges ● Photo Check-ins ● Guild Competition ● Streak Tracking ● Social Sharing

04

User Research Insights

Who is Our Competitors, and Where do We stand in the market

Competitive Analysis

Feature	Unplugged	Forest	Habitica	Duolingo	Flipd
Offline Challenges	✓	—	—	—	—
Gamification	✓	✓	✓	✓	—
Social Guilds	✓	—	✓	✓	—
Focus Timer	✓	✓	—	—	✓
Photo Check-ins	✓	—	—	—	—

 **Key Finding:** No competitor combines **offline challenges + social guilds + gamification** — this is Unplugged's unique market position.

Digital Detox Apps

Forest, Flipd, Opal — Focus blocking and time tracking only

Habit & Productivity

Habitica, Fabulous — Habit tracking with basic gamification

Social Platforms

Strava, BeReal — Social proof and community features

Creativity Apps

Pinterest, Meetup — Inspiration and group activities

Unplugged combines the **best of ALL** these categories into one unified experience

05

Target Audience & Personas

Who Unplugged is designed for and their needs

Target Audience & User Personas

30%

Teenagers 12-18

Struggle with screen time and love games.

Formative years for habit building — perfect time to develop healthy digital behaviors.

- High screen time
- Social

45%

Young Adults 19-30

★ **PRIMARY FOCUS** — Highest Engagement

University students & young professionals improving productivity. Career establishment phase needing focus tools.

- Productivity
- Career focus

25%

Adults 31-45

Balancing work, wellness, and digital overload.

Rediscover offline hobbies and create boundaries for better mental health.

Age Distribution

■ Teens 12-18 ■ Young Adults 19-30 ■ Adults 31-45

Key Pain Points

- Too much screen time
- Difficulty focusing
- Losing motivation
- Poor work-life balance
- Social media burnout
- Bored without phone
- Lack of offline hobbies
- Parental concerns

Insight: Young adults 19-30 represent the highest engagement potential — balancing productivity needs with social connection.

06

User flow and journey map

User Flow & Journey Map

iOS Platform

- iOS 14+ support for iPhone & iPad
- Screen Time API integration for accurate tracking
- Home screen widgets for quick progress view

Android Platform

- Android 10+ for phones & tablets
- Digital Wellbeing integration
- Material Design 3 components

User Journey Summary

Discovery → Onboarding → Exploration → **Action** → Validation → **Reward** → Sharing → Retention
User finds app → Creates account → Joins guild → Does challenge → Photo proof → Earns XP → Shares → Returns

3 Core User Types

11 Journey Steps

2 Platforms

07

Prototypes

Handmade Prototype & Key Iterations

Paper sketches showing initial screen layouts and navigation flow

KEY IMPROVEMENTS

From Paper to Digital

- 1 **Simplified navigation** — 5-tab to 3-tab bottom nav
- 2 **Added photo check-in** — proof of offline completion
- 3 **Redesigned challenge cards** — better visual hierarchy
- 4 **Guild discovery flow** — interest-based filtering added
- 5 **Analytics dashboard** — progress tracking added

✓ **Design decision:** User needs influenced every transition from paper to digital — early testing prevented costly redesigns later.

Evolution Path

Figma Prototype Showcase

FIGMA PROTOTYPE

High-Fidelity Screens

Interactive prototype with complete user journey, consistent design system, and polished UI components.

- ✓ Interactive navigation between all screens
- ✓ Consistent typography, colors, and icons
- ✓ Clear CTAs and accessible layouts
- ✓ Evidence of improvements from handmade

- Onboarding flow
- Challenge list & detail
- Guild community feed
- Profile & analytics

Handmade Prototype → Figma Prototype → Final User Experience

UI Design System & Visual Hierarchy

UI Design System

COLOR PALETTE

#FCEA2B

warm Yellow

#3CC827

Growth Green

#F5F5F5

Neutral White

Color Psychology

Yellow → warm & motivation

Green → Growth & achievement

White → Clarity & focus

TYPOGRAPHY

QuattrocentoSans — Headings

Liter Regular — Body text and UI

COMPONENTS

DESIGN PRINCIPLES

Balance

Visual weight through scale and proportion

Contrast

Hierarchy through color, size, shape

Hierarchy

Bigger/bolder = more important

"The colours create a feeling of starting → growing → achieving — yellow for energy, green for growth, white for clarity."

Visual Hierarchy & Accessibility

Element	Strategy	Application in Unplugged
Typography	Clear heading levels, readable body, consistent font families, appropriate sizes	H1: 32px Bold, H2: 24px, Body: 18px Liter — creates clear reading order
Color Scheme	Meaningful colors, strong contrast, brand consistency, accessible combinations	green for CTAs, bold green for success, white backgrounds — WCAG AA compliant
Spacing & Alignment	White space, margins, padding, grid structure, clean alignment	8px grid system, 60px page margins, consistent component spacing
Contrast	Emphasize important elements through size, color, weight, placement	Primary buttons at 48dp, high contrast text, focused screen layouts
CTA Design	Primary actions visible, clear, and easy to identify	Green filled buttons with bold labels, positioned at thumb zone
Screen Organization	Group related content logically, one clear focus per screen	Challenge cards group actions, profile groups stats, single-task flows

HIERARCHY IMPACT

Guides Attention

Users know where to look first through systematic visual hierarchy

Improves Readability

Typography and spacing reduce cognitive load and visual fatigue

Supports Action

Clear CTAs and visual cues guide users toward completing goals

Accessibility: All color combinations meet WCAG AA standards. Icons have text labels. Touch targets are minimum 48dp. Screen reader compatible.

09

Business & Marketing

Business Model Canvas

Business Model Canvas

Key Partners  - Schools & universities - digital wellness foundations - Productivity influencers on TikTok / YouTube - Nonprofits promoting healthy tech use - Experts in habit-building & behavioral psychology	Key Activities  - Designing weekly offline creative challenges - Updating gamification system - Community moderation - Maintaining user analytics (focus, screen-time reduction) - Educational partnerships (schools, wellness programs)	Value Propositions  - A gamified digital detox app that boosts focus by encouraging users to complete offline creative tasks. - Helps reduce screen addiction through fun challenges inspired by logic, creativity, and mindful activities. - Designed for students, parents, and young professionals who want healthier tech habits. - Provides schools and parents with structured tools to encourage better screen-time balance.	Customer Relationships  - Personalized challenge recommendations - Gamified streaks, badges, and milestones - Community sharing space for completed challenges - In-app encouragement + progress insights	Customer Segments  Teens (12–18) - Struggle with high screen time - Interested in challenges, gamification, and social competition - Parents often encourage healthier tech habits Young Adults (19–30) - University students and early-career professionals - Want better focus, productivity, and offline hobbies - Highly active on social media → strongest viral potential Adults (31–45) - Working professionals wanting digital balance - Parents aiming to model healthier tech habits - People with burnout or screen fatigue
Cost Structure  - App development (iOS + Android) - Content creation (weekly challenges) - Server + cloud costs - Marketing & influencer partnerships - Research + testing with students/schools - UX/UI design updates - Community moderation & customer support	Competitors  - Forest: focuses only on timers → Unplugged adds creative challenges - Habitica: focuses on habits → Unplugged focuses on offline hours - Duolingo: gamified, but not related to detox → different domain - No major app currently gamifies offline creativity as the core mechanic		Revenue Streams  Premium subscription - Unlimited guilds - Advanced analytics (weekly offline hours, streaks, focus insights) - Family or group dashboards One-Time Purchases / Challenge Packs - Limited-time seasonal challenges Affiliate Marketing / Product Partnerships - Connect challenges to products or experiences - Non-intrusive ads could be added to free tier Sponsored Quests (B2B Partnerships) - Brands sponsor official challenges - Creates revenue without charging users

Reflection & Conclusion

Lessons learned, future work, and closing

Lessons Learned & Future Improvements

TEAM LESSONS

- 1 User research is essential** — early feedback prevented major design mistakes and saved development time
- 2 Iteration matters** — the handmade prototype revealed navigation issues before costly digital work
- 3 Consistency is key** — the design system ensured visual coherence across all 20+ screens
- 4 Accessibility should be built-in** , not added later — WCAG compliance from the start

FUTURE IMPROVEMENTS

-  **Screen Time API** integration for automatic tracking
-  **AI-powered** personalized challenge recommendations
-  **Expanded guild features** — voice chat, events, meetups
-  **Corporate wellness** program partnerships
- Wearable support** — Apple Watch & Wear OS apps
-  **Multi-language support** for global expansion

“Design theory helped us organize the layout using clear structure, hierarchy, and spacing, making it easy for users to navigate between challenges, guilds, and actions without confusion.”
